

Warriors' Path State Park Environmental Education School Programs

Warriors' Path State Park offers a wide range of natural learning experiences for children and teens! You and your students can enjoy wildlife in the classroom, conservation projects in the schoolyard, and nature discovery just outside the door!

These learning activities are offered as a *free* service by Tennessee State Parks, and are available throughout the school year (fall, winter & spring)

Each April and May, we take requests for programs for the next school year. Spring is the time to arrange for a nature hike, creek walk, or other field trip to Warriors' Path. Spring is *also* the time to request that Ranger Marty Silver bring his award-winning nature education programs to your school.

We accept program requests *in order* as we receive them, and then arrange a complete schedule for next school year. So the sooner you call, the more likely we can include *your* school on our calendar. Just let us know how we can serve you! Call 423-239-6786, or email Marty.Silver @state.tn.us, and leave a complete message, including:

- School name, contact person, & telephone number
- Number of grades and classrooms
- Type of program requested
- Approximate time(s) of year for these programs

Thanks for this opportunity to work with the precious young people in your care. All of us at Warriors' Path look forward to hearing from you!
